Washing Chamois Gloves. The chamois gloves in white and light shades which are worn by bicyclists may be washed in the following manner, says a writer in the New York Sun: Make a lather with castile soap and warm water, using a spoonful of plain, except two funny little bobs on ammonia to each quart. How to Avoid Sore Throats. A very simple precaution taken with the throat so as to keep it well and nealthy will be labor and time very well expended. A relaxed throat should be attended to at once. A gargle can be used of strong vinegar (or lemon juice), and cold water and lemonade can be drunk often. Now and then the throat must be painted inside with a solution of tannic acid in glycerin. A tonic must be taken, and the throat not allowed to be too much covered up.
